SUMMARY

- IT professional having 7+ years of software development experience, I have achieved solid background working with different technologies
- Passionate about building websites both from scratch or using CMS I am able to convert designs and customer requirements into working websites
- Ambitious problem solver with a passion for web development and I enjoy being in a team of like-minded developers. Committed and motivated, I am seeking for a position where I can further apply and develop my knowledge for the benefit of the company and myself
- I'm a self-taught, fast learner and detail-oriented person, I've achieved a lot of knowledge and experience by working also on my own projects and portfolio because I'm truly passionate about web development
- I enjoy working with other development team members and software architects as a part of a team but I am also confident working on my own for designing and implementing the best solution for the project

PHP	jQuery	PL/SQL
WORDPRESS	API integration	MySQL
HTML	JSON	VBA
CSS	AJAX	Excel / Microsoft Office
Bootstrap	GIT	Crystal Reports
SASS / SCSS	FTP	Adobe Photoshop / Figma
JavaScript	SQL	

WORK EXPERIENCE

2022 September – Present

Software Developer

SYNETIQ, Bentley Moor Ln, DN6 7BD, Doncaster, South Yorkshire, United Kingdom

- I've been promoted and will have more responsibilities

2021 July – 2022 September

Junior Software Developer

SYNETIQ, Bentley Moor Ln, DN6 7BD, Doncaster, South Yorkshire, United Kingdom

SYNETIQ is the UK's leading vehicle salvage, dismantling and recycling specialist.

My responsibilities are:

- Working as part of an Agile team, attending to daily scrum meetings
- Working on the assigned tasks (all tasks are planned for a 2-week Sprint)
- Deploying the applications through automated pipeline in CI/CD or deploying code manually through FTP
- Offering customer support using a Helpdesk system features
- Renewing and installing the clients' SSL certificates before expiration date
- Performing unit testing
- Using GIT for version control
- Some of the technologies we are using: PHP (all of our websites), WordPress (our main SYNETIQ website's PHP code is wrapped into WordPress), Azure, AWS, HTML, CSS, JavaScript, GIT, FTP, MySQL.

2019 August – 2021 July

Warehouse Operative

XPO Logistics, S72 0HN, Barnsley, South Yorkshire, United Kingdom

2017 February – Present

Freelance Web Developer

During my freelance period I built bespoke websites, mobile responsive and designed with a clear focus both on User Experience and User Interface. The visitor is easily guided through the site and the call to actions.

Wanting to offer a complete solution I was also doing the following:

- Registering web domain names and organising their hosting.
- Designing and deciding on the visual layout of websites.
- Optimising web assets for a good speed and performance.
- Researching new technologies, software packages and hardware products. Giving advice on the limitations of systems and websites.
- Making suggestions for improvements in technology, content and user interactions.
- Testing a website before it goes live and identify any problems.

Apart from websites I have built a few web applications. One that is worth mentioning is *TicketsApp*. This web app is a ticketing management tool that is meant to be used internally by companies to track all requests/issues related to multiple projects.

This app together with a few websites can be found at <http://butcosoft.com>

2016 April – 2016 December

Warehouse Systems Assistant

Poole Lighting Limited, BH23 3PE, Christchurch, Dorset, United Kingdom

The key responsibilities were:

- maintenance of EDI & integration with the Warehouse Management System (Proteus)
- identify and implement system improvements to the existing warehouse operations by creating new reporting tools or changes to existing process
- provide ODBC (Open Database Connectivity) reporting for the warehouse and business at all levels. Reports creation, maintenance and scheduling to provide efficient processes with automated reports. These reports provide critical business data to senior management team and directors
- provide onsite hardware & network support, particularly for RF guns (Radio Frequency Scanners), Access Points, warehouse printers and computers

2013 January – 2016 March

Software Developer

RBC Logistic Solutions, Timisoara, Romania (<http://rbc.com.ro>)

The purpose of the company was to create software solutions for logistic warehouses (WMS = Warehouse Management System). The software was developed based on customer demands. The WMS software was capable to control stock movements including receiving, shipping and picking. All the actions/movements were centralised into a database which could provide lots of reports about the status of goods in the warehouse.

My duties were:

- analyse & estimate solutions – analyse the customer's demands, provide the optimal solution and estimate the time needed to implement it
- develop & test the software in house
- install the software on customer's site
- test the software on site
- write user's manual
- customer support

2008 July – 2011 June

Software Developer

SSI-SCHAEFER SRL, Timisoara, Romania (<http://www.ssi-schaefer.de/en>)

This company is one of the largest logistics providers worldwide.

I am software developer and I use ORACLE Databases with PL/SQL in order to create manual or fully automated warehouses.

The software allows to control and optimise various processes in the warehouse (e.g. goods in, storage, picking, goods out, stock management, goods tracking etc).

The main projects where I was part of are:

- TEVA - UK – Leeds
- ARMTEK – RUSSIA – Moscow
- Other Romanian projects (Smaller companies)

EDUCATION AND TRAINING

COURSES

- The Web Developer Bootcamp (by Colt Steele)
- The Complete Web Developer Course 2.0 (by Rob Percival)
- iOS11 & Swift 4 - The Complete iOS App Development Bootcamp (by Angela Yu - London App Brewery)

2004 - 2008 West University, Faculty of Economy and Business Administration, IT for Business, Timisoara, Romania

PERSONAL SKILLS

- Good communication skills
- Team spirit
- Autodidact, open to learn and continuously improving
- Flexible, sociable and adaptable to new
- Passionate about technology and software development

Driving licence Yes, since 2005
